

The Problem

- **20-40 hours per project** spent on compliance paperwork
- **Significant regulatory fines** for missed notifications
- **Spreadsheets can't scale** across multiple projects and teams
- **No audit trail** for regulatory review and inspections

The Solution

- **Compliance wizard** maps exact regulatory requirements
- **Hazard mapping** with 30+ contamination categories
- **Lab result tracking** with auto contamination flagging
- **Full audit trail** and document management system
- **Real-time dashboard** for monitoring all projects

Key Features

Compliance Wizard

Guided decision tree walks you through jurisdiction-specific requirements. Never miss a filing or notification deadline again.

Hazard Mapping

Interactive map with 30+ contamination categories. GPS-tagged sites with real-time status indicators and satellite imagery.

Lab Tracking

Import lab results, auto-flag contamination exceedances, and generate compliance reports with full chain-of-custody documentation.

Starting at \$99/mo
